The diagram shows five sequential steps for assembling a red frame component. Step 1 shows two grey axle pins being inserted into a red axle connector. Step 2 shows a red axle pin being inserted into the top of the connector. Step 3 shows a second red axle pin being inserted into the top. Step 4 shows a second red axle pin being inserted into the bottom of the connector. Step 5 shows a grey axle connector being inserted into the bottom of the frame.

The main assembly view shows a complex red mechanical structure. A black axle is being inserted into a hole in the structure, as indicated by a black arrow pointing downwards from the assembly sequence diagram above. The structure is built with red Technic beams and connectors, and includes several grey axle pins and connectors. A yellow component is visible on the right side of the structure.
