Delta II  
(Teal)

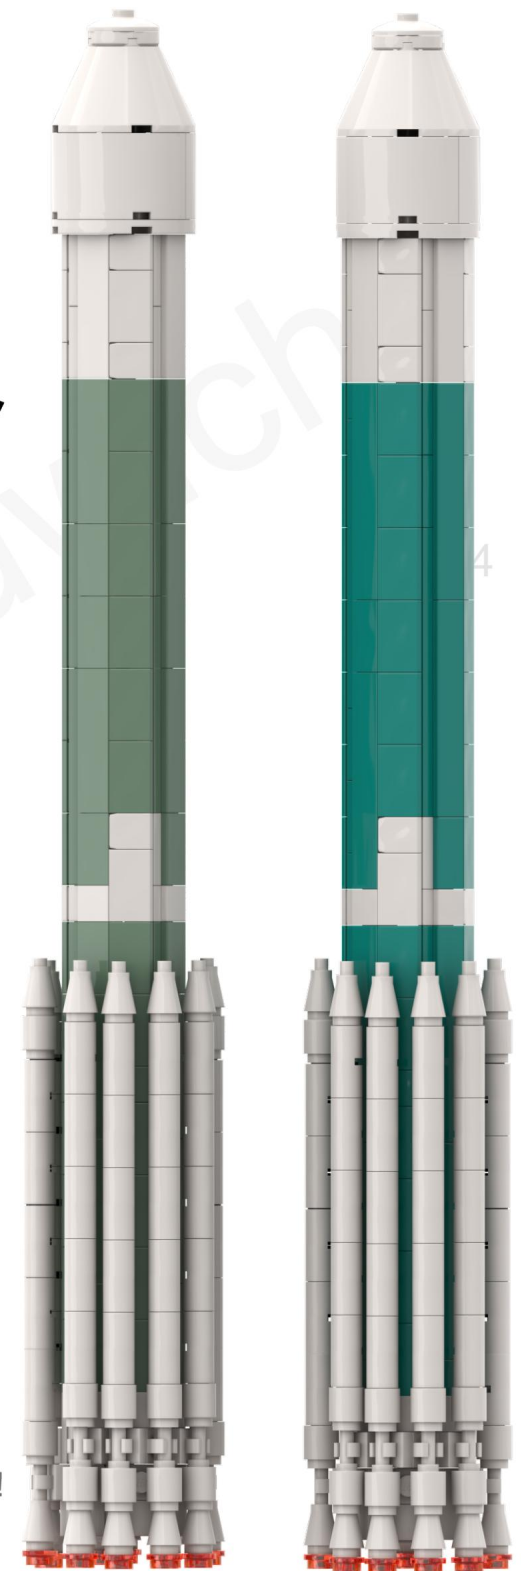

**SPECIAL EDITION**

Note: This is the same exact model as the other Delta II, with a swap of the Sand Green to Teal (Also known as Dark Turquoise) which better represents the "Delta Blue" used on the real rocket. This would have been a standard, however teal bricks are rather rare and super expensive with the color being discontinued in the early 2000s and it was brought back in 2018. Due to this rarity, I would recommend ordering most of the Teal from Lego's own "Bricks and Pieces" service due to greater availability and lower cost.

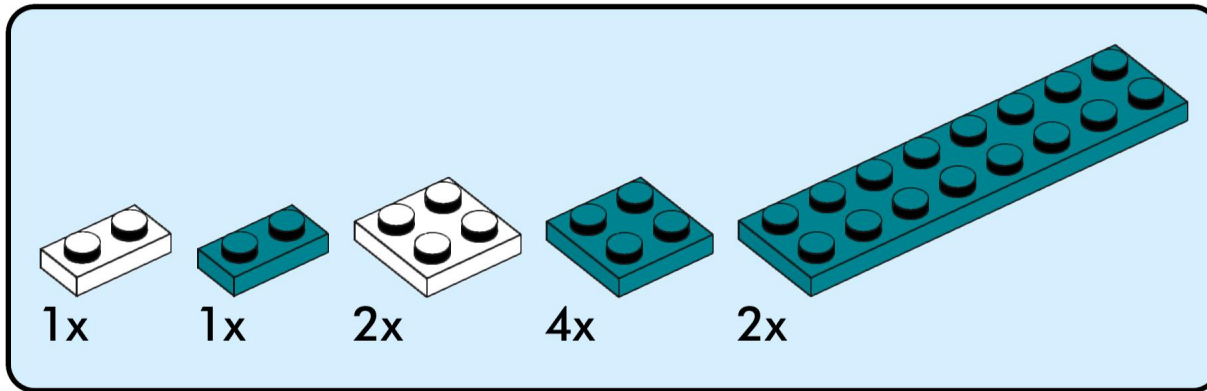

tribute!
